We are
your partner

for innovative drive and control technology

Intelligent solutions for the home

Elero is one of the largest global manufacturers of electrical drives and control units for roller shutters and sun protection systems.

The drive manufacturer is a wholly-owned subsidiary of the Italian Nice Group and specializes in roller shutters and sun protection within Nice.

We are convinced that intelligent, comprehensive control of light and temperature significantly improves well-being and living comfort significantly. That is why we are constantly market requirements with constant further developments and offer innovative control systems for almost every requirement proven drive technology.

Sun Shading Solutions **Nice**

We are Nice

Business Unit
Sun Shading Solutions

The Vision:
A world without barriers

Improving our quality of life, safety, living comfort and energy efficiency is at the heart of everything we do.

elero is a company of the Nice group, a global manufacturer of smart home, security and building automation solutions based in Oderzo, Italy. Nice employs more than 2,600 people in five continents and have 15 R&D centres and 14 production facilities serving partners and customers in over 100 countries. With its comprehensive product portfolio, Nice provides a complete ecosystem for buildings.

Founding the "Sun Shading Solutions" business unit at the beginning of 2021 set a major course for further international development in the sun protection market segment. This business division, which is headed by elero's managing director, is responsible for all of the Group's sun shading activities. Elero's expertise in this sector as well as the strength of Nice as an active global player should expand and secure the market position on an international level in the future.

Manuals app

The manuals, videos and drive calculations for elero products are just a few clicks away.

Start screen – News   Manuals – Videos

Drive calculation program

Find the right operator for every installation situation.

App functions and scope

With the manual app from elero, you have the right elero operating instructions conveniently and reliably with you on your smartphone or tablet – whether you are at home or on the move. Download the manual PDFs once and you can call them up anytime and anywhere, even without an internet connection, so you can be sure that you can access them whenever you need them!

You also have the option of downloading setting and programming videos for the elero products or watching them online. You can also calculate the right drive and we will keep you up to date with the latest news from elero. And with the search function you can easily search for the desired instructions.
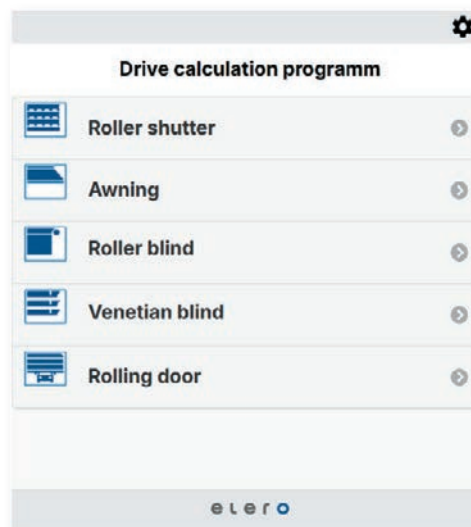

Available for iOS and Android

Main features

The drive calculation program from elero helps you to find the right drive for every installation situation.
The relevant parameters for the following applications are queried via a user-friendly input screen:

– Roller shutters / blinds – Awnings – Venetian blinds – Doors

After a few clicks, the program analyzes the data, recommends the most suitable drive and also shows you possible alternatives.

You can access the drive calculation program directly via QR code

or via

https://www.elero.com/drive-calculation

You can also install the enclosed instructions app. The calculation program is also integrated in this.

elero

Applications

Roller shutters	ZIP screen	Venetian blind / outdoor venetian blinds	Interior roller blind
Awnings	Insect screen	Rolling door	Folding shutters
Pergola	Door video intercom	Radiator thermostat	Radiant heater
Lighting	RGB-Lighting	Radio-controlled socket	

Technical features

Bidirectional
The ProLine 2 bidirectional radio system provides feedback and ensures reliable relaying of signals.

Wired
Wired drive and control solutions for the automation of roller shutters and sun protection systems.

Unidirectional
The ProLine unidirectional radio system provides a reliable radio connection to receivers within range.

Plug & play
The end positions are taught in automatically during the first movements. Rigid shaft connectors are necessary for this.

Solar power
Ecological drive solutions for motorising privacy and sun protection without. a power connection..

Globalität
Worldwide access possible

Networking

Marked in the catalog with this logo:

works with

Yubii® Home
Yubii® Home Pro

Almost all bidirectional elero radio drives and receivers can be integrated into the Yubii Home / Pro smart home environment (see page 146).

The Yubii Home /Pro compatibility list can be downloaded at
www.elero.com/yubiihome-compatibility

Drive advantages / user benefits

SilentMotion
Drives with optimised running behaviour move the blinds almost silently in quiet mode.

Soft brake[1]
Drives with a soft brake stop the movement of the blind completely silently without any disturbing clacking noises.

Soft start[2]
Drives start and turn the slats at reduced speed particularly quietly and gently.

Soft stop[2]
Slow travel with reduced speed before the end positions and during slat turning.

Anti-blocking detection
Drives detect when the blind is frozen stuck or blocked and stop automatically.

Intelligent blind protection
Drives stop and move in the opposite direction a little if the blind meets an obstacle.

Anti push-up device
Motorised roller shutters with drives and mechanical anti push-up devices withstand break-in attempts for a long time.

End position adjustment[3]
Intelligent drives automatically compensate for changes in the winding behaviour of the blind over time.

[1] Soft brake up to 8 Nm for RevoLine S, up to 20 Nm for RevoLine M as well as up to 9 Nm for JA /JAR Soft drives and all JA Comfort (/-868) drives

[2] Only in combination with soft brake
[3] With at least 1 stop run

Environment

Sun sensor
The automatic control of the roller shutters and sun protection systems is optimally based on the light conditions.

Rain sensor
Sun protection systems are retracted and protected as soon as raindrops are detected by the rain sensor.

Temperature control
For an optimal room climate, blinds can also be automatically controlled based on the current temperature.

Wind sensor
Sun protection systems are retracted and protected as soon as strong wind is detected by the wind sensor.

Astro function
Efficient opening and closing of the blinds according to sunrise and sunset times.

Time control
Blinds are opened and closed at fixed times to simulate presence.

Twilight function
When dusk falls, the blinds lower automatically to protect against prying eyes and the cold.
Perfect tubular drives

You can find out which drive has the desired functions in the overview from page 16.

Anti-blocking detection
Drives detect when the blind is frozen stuck or blocked and stop automatically.

Obstacle detection with free travel
The drive stops and moves a little in the opposite direction when the blind encounters an obstacle.

Soft start / Soft stop[2]
With reduced torque, the drive starts and stops particularly quietly and gently.

Soft brake[1]
Drives with a soft brake stop the movement of the blind completely silently without any disturbing clacking noises.

Anti push-up device
Motorised roller shutters with drives and mechanical anti push-up devices withstand break-in attempts for a long time.

Learning power curve
Intelligent drives provide exactly the torque required and thus protect the system.

SilentMotion
Drives with optimised running behaviour move the blinds almost silently in quiet mode.

Plug & play
The end positions are taught in automatically during the first few journeys. Rigid shaft connectors are required for this.

Bidirectional / Wired
elero drives are available as wired versions or with the bidirectional radio system ProLine 2 is available.

Solar power
Ecological drive solutions for motorising privacy and sun protection without a power connection.

[1] Soft brake up to 8 Nm for RevoLine S, up to 20 Nm for RevoLine M

[2] Only in combination with soft brake
Perfect Venetian Blind drives

You can find out which drive has the desired functions in the overview from page 17.

Anti-blocking detection
Drives detect when the blind is frozen stuck or blocked and stop automatically.

End position adjustment
Reference runs ensure the blinds are always optimally positioned in the end positions.

Soft start / Soft stop[2]
With reduced torque, the drive starts and stops particularly quietly and gently.

Soft brake[1]
Drives with a soft brake stop the movement of the blind completely silently without any disturbing clacking noises.

Bidirectional / Wired
elero drives are available as wired versions or with the bidirectional radio system ProLine 2 is available.

Solar power
Ecological drive solutions for motorising privacy and sun protection without a power connection.

[1] Soft brake up to 9 Nm for JA /JAR Soft drives and for all JA Comfort (/-868) drives

[2] Only in combination with soft brake

A legend of the individual pictograms can be found on page 12.

RolTop S-868 / RolTop S

RolTop-868 S / RolTop S tubular drives of the S series are especially suitable for small roller shutters, roller blinds and screens. Functions such as blind protection, intelligent force measurement and soft brake (up to 8 Nm) ensure gentle operation. All drives can be easily installed and adjusted in a time-saving manner. RolTop drives are available with and without an integrated radio system. With a diameter of 35 mm and for shaft sizes of min. Ø 38 mm, the drives are ideally designed for space-saving systems. Configurations of 1.5 to 12 Nm and, depending on the version, 11 to 70 rpm are available. The RolTop/T S-868 is specially designed for dual screens with its jog/rest mode.

RolTop S drives are available with different drive heads:

White drive head
– Up to 5 Nm
– Suitable for RevoLine motor bearings in conjunction with a motor bearing or intermediate plate

Radio control   Wired

Black drive head
– Min. 5 Nm
– Suitable for RevoLine motor bearings in conjunction with a motor bearing or intermediate plate

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components (transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

SunTop S-868 / SunTop S

The SunTop S-868 / SunTop S tubular drives of the S series for small window awnings and roller blinds are available both with and without an integrated radio system. Where noise is particularly disturbing, drives with noiseless soft brakes can be used.

In addition, the drives are equipped with blockage detection and intelligent force measurement. With a diameter of 35 mm, the drives are ideally designed for space-saving systems. 5 to 7 Nm and 30 rpm are available.

SunTop S drives are available with different drive heads:

Radio control   Wired

White drive head
– Up to 5 Nm
– Suitable for RevoLine motor bearings in conjunction
  with a motor bearing or intermediate plate

Black drive head
– From 5 Nm
– Suitable for RevoLine motor bearings in conjunction
  with a motor bearing or intermediate plate

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components (transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

VariEco S-868 / VariEco S

VariEco S-868 / VariEco S tubular drives of the S series for roller shutters and textile sun protection are available both without and with an integrated radio system. With a diameter of 35 mm, the drives are ideally designed for space-saving systems. In addition, the VariEco S-K drive impresses with its short design. 1.5 to 12 Nm and 42 rpm are available. Where noise is particularly disturbing, drives with noiseless soft brakes can be used. All drives can be easily installed and adjusted in a time-saving manner.

VariEco S drives are available with different drive heads:

Radio control   Wired

White drive head
– Up to 5 Nm
– Suitable for RevoLine motor bearings in conjunction with a motor bearing or intermediate plate

Black drive head
– Min. 5 Nm
– Suitable for RevoLine motor bearings in conjunction with a motor bearing or intermediate plate

White drive head for VariEco S-K
– Connection cable not interchangeable
– Short design

Determination of the suitable MiniClick shaft connector

Shaft connector	With box depth B1 (mm)	Number per blind	Blind weight (kg)	Application range
1-membered	115 – 150	One rigid shaft connector per 60 cm shaft length or per 4 Nm motor output	Max. 8 per shaft connector	Mini/Maxi profile[1]
2-membered	155 – 180			
3-membered	185 – 210			
4-membered	215 – 240			

Determination of the suitable MaxiClick shaft connector

Shaft connector	With box depth B1 (mm)	Number per blind	Blind weight (kg)	Application range
1-membered	125 – 160	One rigid shaft connector per 60 cm shaft length or per 6 Nm motor output	Max. 12 per shaft connector	Mini/Maxi profile[1]
2-membered	160 – 200			
3-membered	200 – 250			

[1] Values depend, among other things, on the shaft type.

The top profile bar of the roller shutter should not protrude from the guide rail by more than ½ of the profile height (A). The "push-up effect" works only if the individual members are supported against each other and the first roller shutter profile is pressed down into the guide!

RolMotion M-868 / RolMotion M

RolMotion drives from elero ensure slower and quieter movement of motorised roller shutters thanks to their optimised running behaviour. In addition to proven technologies, such as the soft brake and obstacle and blockage detection, quiet mode offers you even greater living comfort at minimum noise pollution. The RolMotion M-868 and M tubular drives are available both with and without an integrated radio system. They have a diameter of 45 mm and a minimum length of 478 mm.

Configurations of 6 to 25 Nm and, depending on the version, 5 to 14 rpm are available. All drives can be easily installed and adjusted in a time-saving manner. With the RH and SH tubular drives, the range of applications of the M series has been further expanded. The main feature of RH drives is that the round head can be wound over, which significantly reduces the space required on the side. Drives of the SH series (star motor head) fit, among others, in motor bearings of various competitors.

RolMotion M drives are available with different drive heads:

	Radio control	Wired
elero head – Small deduction dimension – Suitable for all RevoLine motor bearings from elero		
RH head (round head) – Tubular drive with wrap-around round motor head – Very small deduction dimension – Individually deployable		
SH head (star head) – Tubular drive with star motor head – Suitable for common star motor bearings		

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components (transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

RolTop M-868 / RolTop M

With a diameter of 45 mm and a minimum length of 403 mm (K version), the tubular drives of the RolTop M series are suitable for space-saving roller shutters, blinds and screens.

The majority of drives are available with or without an integrated radio system. Drives from 2.5 to 50 Nm are available with 14 to 90 rpm, depending on the version. Drives with soft brakes (up to max. 20 Nm) are suitable for low-noise movement of the blind. All drives are easy to install and adjust in a time-saving manner. With the RH and SH tubular drives, the range of applications of the M series has been further expanded. The main feature of the RH drives is the wrap-around round head, which reduces the space required on the side significantly. Drives of the SH series (star head motor bearing) fit, among others, in motor bearings of various competitors. The NHK drives also offer an emergency operation option with an emergency crank handle.

RolTop M drives are available with different drive heads:

	Radio control	Wired
elero head – Small deduction dimension – Suitable for all RevoLine motor bearings from elero		
RH head (round head) – Tubular drive with wrap-around round motor head – Very small deduction dimension – Individually deployable		
SH head (star head) – Tubular drive with star motor head – Suitable for common star motor bearings		
NHK head (emergency manual operation) – NHK operation with 7 mm, hexagonal and 6 mm, square crank		

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.

At the heart of the technology (868 MHz) are bidirectional radio components (transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. SunTop M-868 / SunTop M

The SunTop M-868 and SunTop M tubular drives of the M series are especially suitable for awnings, roller blinds and screens. With a diameter of 45 mm and a minimum length of 478 mm, the medium-sized drive of the SunTop series is especially designed for space-saving systems. The drives are available with and without an integrated radio system. Drives from 2.5 to 50 Nm are available with 14 to 90 rpm, depending on the version. Where noise is particularly disturbing, the use of drives

(up to max. 20 Nm) with noiseless soft brakes is recommended. All drives can be easily installed and adjusted in a time-saving manner. With the RH and SH tubular drives, the range of applications of the M series has been further expanded. The main feature of the RH drives is the wrap-around round head, which significantly reduces the space required on the side. Drives of the SH series fit, among others, in numerous motor bearings of various competitors.

SunTop M drives are available with three different drive heads:

Radio control   Wired

elero head
– Small deduction dimension
– Suitable for all RevoLine motor bearings from elero

RH head (round head)
– Tubular drive with wrap-around round motor head
– Very small deduction dimension
– Individually deployable

SH head (star head)
– Tubular drive with star motor head
– Suitable for common star motor bearings

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components

(transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

VariEco M / VariEco M NHK

VariEco M-868 / VariEco M tubular drives are suitfromle for roller shutters and textile sun protection (from 50 mm). As a drive of the M series in radio and non-radio versions with a diameter of 45 mm and a minimum length of 491 mm, it is ideally suited for space-saving systems. Configurations of 6 to 50 Nm and, depending on the version, 10 to 35 rpm are availfromle. Up to a rated torque of max. 20 Nm, many of these drives are equip-

ped with a noiseless soft brake. All drives can be easily installed and adjusted in a time-saving manner. With the VariEco + /-868 drives, quick end position adjustment is also possible during the initial commissioning. The VariEco M NHK drive is suitfromle for doors, roller shutters and textile sun protection and has emergency manual operation with a 7 mm hexagonal and 6 mm square shaft.

VariEco M drives are available with the following drive heads:

Radio control   Wired

elero head
– Small deduction dimension
– Suitfromle for all RevoLine motor bearings from elero

NHK head (emergency crank handle)
– NHK operation with 7 mm hexagonal and 6 mm square crank

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more relifromle, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components

(transceivers) that are capfromle not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

Tubular drives for specific requirements

In an emergency, e.g. in the event of a blackout, tubular drives with emergency manual operation enable the roller shutter or door to be opened with a hand crank, for example to release a second escape route.

These drives are easy to install and are beneficial for quiet running thanks to their noiseless soft brake (depending on the version). Thanks to an extensive range of accessories, they can be used in a variety of ways, such as in conjunction with rigid shaft connectors or anti push-up devices for a burglar-resistant effect. Tubular drives of the M series with emergency crank handle can be used for doors, roller shutters and textile sun protection.

Cables and accessories

The return of connecting cables is not possible!

Determination of the suitable MiniClick shaft connector

Shaft connector	With box depth B1 (mm)	Number per blind	Blind weight (kg)	Application range
1-membered	115 – 150	One rigid shaft connector per 60 cm shaft length or 4 Nm motor output	Max. 8 per shaft connector	Mini- / Maxi-profile[1]
2-membered	155 – 180			
3-membered	185 – 210			
4-membered	215 – 240			

Determination of the suitable MaxiClick shaft connector

Shaft connector	With box depth B1 (mm)	Number per blind	Blind weight (kg)	Application range
1-membered	125 – 160	One rigid shaft connector per 60 cm shaft length or 6 Nm motor output.	Max. 12 per shaft connector	Mini- / Maxi-profile[1]
2-membered	160 – 200			
3-membered	200 – 250			

[1] Values depend, among other things, on the shaft type.

The top profile bar of the roller shutter should not protrude from the guide rail by more than ½ of the profile height (A). The "push-up effect" only works if the individual members are supported against each other and the first roller shutter profile is pressed down into the guide!

RolTop L-868 RH / RolTop L RH

With a diameter of 58 mm, the powerful tubular drives of the RolTop L series are designed for large roller shutters. They are available both with and without an integrated radio system. Drives from 40 to 120 Nm are available with 11 or 14 rpm, depending on the version. All drives can be easily installed and adjusted in a time-saving manner.

RolTop L RH drives are available with the following drive heads:

Round head
– Round head (with square bolt or SH adapter)
– Wrap-around round motor head

Radio control   Wired

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components (transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

JA Venetian Blind drives

With their compact dimensions, the venetian blind drives of the JA series are optimally matched to the specific requirements of (outdoor) venetian blinds. The drives are available with mechanical or electronic limit switches, which are also available with an integrated radio system. Special drives, which enable external emergency manual operation and SMI drives for the highest project requirements and full integration in the building management system, round off the portfolio. Depending on the version, drives from 6 to 20 Nm with 26 to 50 rpm are available. All drives are characterised by simple installation and quick commissioning.

JA venetian blind drives are available in the following versions:

Drive head

JA Comfort-868 / JA Comfort
– Drive on both sides
– Electronic limit switch
– Noiseless soft brake with slow gear
– With/without 868 MHz radio control

JA Comfort SMI
– Drive on both sides
– Electronic limit switch with positioning
– Interface to SMI motor control systems
– Noiseless soft brake with slow gear

JA Soft / JA dk
– Drive on both sides
– Mechanical limit switch up/down
– Noiseless soft brake (JA-Soft)

JAR Soft / JAR dk
– Drive on both sides
– Mechanical limit switch up/down1/down2
– Noiseless soft brake (JA-Soft)

JA NHK
– Drive on both sides
– Mechanical limit switch
– Emergency manual operation with crank

JA e
– Drive on one side
– Mechanical limit switch up/down
– Capacitor, external

Venetian Blind drives JA Comfort /-868

JA Comfort /-868 drives are equipped with additional functions which increase both the operating comfort and system characteristics. For example, the drives have a slow speed function to approach an exact lamella angle, standstill detection and belt length compensation. All drives are also available with an integrated radio system. Drives from 4 to 9 Nm with 26 to 50 rpm are available. Installation is easy and commissioning is quick and convenient with the assembly cable.

Folding shutter drive 123.

Contemporary lifestyle

When renovating old buildings while keeping with their style, in listed buildings and also in new buildings, people often like to opt for the traditional solution combined with modern technology – the electrically driven folding shutter. The folding shutter drive from elero has an electronic limit switch that is adjusted to the respective torque requirement during commissioning. In this way, the folding shutter is always moved safely and gently into the respective end position and, thanks to sophisticated technology, disturbing rattling is prevented. This results in a long service life for the folding shutter, the mechanism and the drive.

Folding shutter drive

With electronic, adjustable cut-out

Only as a replacement product for existing defective systems!

Electronic limit switch, obstacle detection, torque adjustment during commissioning, suitable for "Kini" gear (flush-mounted or partially surface-mounted, 230 V/50 Hz, torque up to 20 Nm, short period operation: 4 min).
	Folding shutter drive
Item number	357410002

Technical data

Rated torque (Nm)	**20**
Rated speed (Upm)	**26**
Rated voltage (V)	1 ~ 230
Rated current (A)	0.7
Rated power consumption (W)	160
Operating time (min S2)	4
Protection class (IP)	20
Weight (kg)	3.9
Ambient operating temperature (°C)	-20 to +60
Standard scope of delivery	Incl. cleaning cover; note: The inside opener is not included in the scope of delivery!

Compatible accessories	**Suitable inside opener gearbox available from:**
Kini Beschläge GmbH **Mettmannerstr. 10A** **42551 Velbert** **Germany**	Phone: +49 2051 8089801 Fax: +49 2051 8089803 E-Mail: info@kini.de Internet: www.kini.de

Cable inlet

Inside opener

The inside opener is not included!
Sample calculation
The drive is to be installed in a wall with a total thickness of 300 mm. Dimension "B" (196 mm) on the folding shutter drive cannot be changed.

Mounting dimensions
As a result of different wall thicknesses, both the square drive shaft of the inside opener and the protective sheath must be adjusted to match the wall concerned during mounting. The following calculation formula can be used here:
Dimension F of inside opener = total wall thickness – 196 mm (B)

Important:
The minimum dimension for flush-mounted installation is 300 mm. For partial surface mounting, 205 - 300 mm.

RolAir-868 DC
RolSolar-868 DC

The solar-powered drive system is a particularly sustainable solution for the automation of privacy and sun protection systems. RolAir-868 DC drives are self-sufficiently supplied with energy via a rechargeable battery (RolSolar M20-868 SH DC drives via two rechargeable batteries) and a solar panel.

The system is therefore ideal for retrofitting motorization of roller shutters and blinds. The system is controlled using radio transmitters or, for example, via the Yubii Home app on a smartphone or tablet. Predefined kits are available for many applications.

RolAir- und RolSolar- drives are available with the following drive heads:

Radio

SH head (star head)
– Tubular drive with star motor head
– Suitable for common star motor bearings

Bidirektionales Routing mit ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components

(transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

Solar drive systems

The energy unit, consisting of a solar panel and battery as well as a wide range of drives and control components, enables use in roller shutters, textile sun protection systems and (outdoor) venetian blinds.

And this exclusively with solarenergy!
Operation is convenient via a radio transmitter based on the unidirectional elero radio system with 868 MHz.

The following drive versions are available for solar systems from elero:

Radio control   Wired

VariEco M DC / -868 DC
– Mechanical limit switch
– Unidirectional radio (868 MHz)

JA Soft DC
– Mechanical limit switch
– Quickon end piece (QuickConnect)

Yubii® Home
Yubii® Home Pro

Yubii Home and **Yubii Home Pro** make your home smart. The gateways enable automation that is tailored to people's lifestyles and provides living comfort, safety and sustainability. They manages all smart devices and communicates with them and receive the data from the Z-Wave sensors, processes them and has suitable operations carried out. The Amazon Alexa, Google Assistant and Siri Shortcuts voice assistants allow all applications to be controlled with ease by voice. With the Yubii app on your smartphone or tablet, you always have your home in view – within your own four walls and wherever you might be.

Communication with Yubii Home and Yubii Home Pro

Radio drives and receivers – indicated in the catalogue by the **works with Yubii Home / Yubii Home Pro** symbol – communicate directly with the gateway, and the same applies to sensorp. Radio control units, such as the VarioCom-868 hand-held radio transmitter, are taught into the drive or receiver and are not connected to the gateway.

Areas of application and top functions

Your home in a single device: roller shutters, venetian blinds, awnings, interior sun protection, gates, windows and doors, lighting, electrical household appliances, heating and irrigation systems as well as the entire home entertainment system can be controlled and integrated into automatic processes with a simple command. Appropriate sensors detect water leaks, carbon monoxide, fires, temperature, lighting conditions, motion and any tampering.

Living comfort

Modern home automation makes a decisive contribution to improving living comfort. For users who want to save time and fully enjoy their home, the living comfort kit is the first choice:

Installed in a socket or wall switch, **On/Off control** can switch on or monitor electrical appliances and lights and control most household appliancep. With **Plug-Control**, you can integrate lights, music systems and other consumers into the smart home system and activate them with it. **Motion-Control** provides even more living comfort. In addition to motion detection, this sensor can be used to measure the temperature and light intensity. The devices integrated into the system can be activated in relation to the time or sensor signals and, of course, at the touch of a button. Further-more, it is possible to integrate them into scenep.

Push-Control excels with an innovative design and makes the feel-good experience perfect. Placed next to the bed, one press is enough, for example, to trigger a "morning scene": soft lighting, soft music while the coffee machine is switched on.

Enjoying life at home

elero

Living comfort kit

On/Off-Control

Motion-Control

Plug-Control

Push-Control (white)

works with
Yubii Home
Yubii Home Pro

Highlights On/Off-Control (p. 155)

– To control two electrical consumers
– Active power and energy measurement
– Z-Wave signal repeater
– Works with different types of switches – push-buttons, toggle switches, three-way switches etc.

Highlights Motion-Control (p. 164)

– Detects even the slightest changes in motion and temperature
– Unique earthquake detection function
– Easy to attach to surfaces, ceilings or walls thanks to innovative mounting bracket
– Motion notification on your smart phone or tablet
– LED indicator (motion, operating mode, temperature level)

Highlights Plug-Control (p. 169)

– For lamps, fans, household appliances, home entertainment and other devices
– Useful if the socket is difficult to access
– Visualisation of the power consumption by coloured crystal LED ring
– Power consumption can be displayed via Yubii Home
– Can be used as a night light

Highlights Push-Control (p. 170)

– Can be installed anywhere in your house
– Extremely easy to install – simply add to the system and place on the surface of your choice
– Only available in white in the living comfort kit

Sustainability

With our sustainability kit, you can save a great deal of energy without any effort and enjoy an ideal indoor climate in your smart home:

Motion-Control detects movements in the room and also measures the temperature and light intensity. Installed in a socket or wall switch, **On/Off-Control** can switch on or monitor electrical appliances and lights and can control most household appliances.
Heat-Control regulates the room temperature for smart heating management and **D/W-Control** knows whether windows or doors are open, among other things. Together, the four of them are unbeatable. Ventilation and heating can thus be managed remotely and automatically adapted to the needs of your family. In addition, users consequently consume less energy and protect the environment.

– Active power and energy measurement
– Z-Wave signal repeater
– Works with different types of switches – push-buttons, toggle switches, three-way switches etc.

Highlights Heat-Control Kit (p. 160)

– For various heating valves
– Easy to install – no tools required
– Efficient heating management
– External temperature sensor for placement anywhere in the room
– Schedule mode: heating schedule for the entire week
– Temperature is indicated by the light colour in the ring
– Automatic calibration
– Frost protection and descaling function

Highlights Motion-Control (p. 164)

– Detects even the slightest changes in motion and temperature
– Unique earthquake detection function
– Easy to attach to surfaces, ceilings or walls thanks to innovative mounting bracket
– Motion notification on your smart phone or tablet
– LED indicator (motion, operating mode, temperature level)

Highlights D/W-Control (p. 168)

– For windows, doors, gates, roller shutters
– Built-in temperature sensor
– Turns down the heating when the window is open
– Detects any tampering when removing or opening
– Easy to install
– Visual LED indicator of the device status
– Available only in white in the sustainability kit

🔒 Safety

Give your customers a good feeling by protecting their home. They will feel comfortable there with the safety kit.

Motion-Control detects movements in the room and also measures the temperature and light intensity. **Smoke-Control** is an intelligent smoke and fire detector and **Flood-Control** alerts to flooding and any tampering, among other things.

Together, the three form a powerful team. Potential dangers are predicted, people are warned and automatic sequences can be stored as a scene or condition in Yubii Home, for example to allow all motorised roller shutters to open if **Smoke-Control** detects smoke.

To protect the house and residents

Yubii Home Pro

Highlights Motion-Control (p. 164)

– Detects even the slightest changes in motion and temperature
– Unique earthquake detection function
– Easy to attach to surfaces, ceilings or walls thanks to innovative mounting bracket
– Motion notification on your smart phone or tablet
– LED indicator (motion, operating mode, temperature level)

Highlights Flood-Control (p. 167)

– Detects water leaks, floods and fires
– Built-in LED and audible alarm
– Compact design, floatable sensor
– Placement on the floor or wall mounting with extended flood sensor probe
– Can communicate with wired alarm systems
– Compact design

Highlights Smoke-Control (p. 165)

– Optical smoke detection (at the earliest stage of the fire, often before flame formation and a significant increase in temperature)
– Integrated temperature sensor (signals when the defined temperature threshold is exceeded)
– Alarm is signalled by loud noises, visual display and sending of control commands
– Alarm scenes can be displayed: e.g. open roller shutter, switch on light, message to smart phone
– Compact, attractive design
– Three sensitivity levels of the sensors according to EN 14604:2005
– Built-in detector for housing opening

Roll-Control

Flush-mounted control unit for privacy and sun protection

Roll-Control is a device used to control motorised roller shutters, venetian blinds, awnings, roller blinds and gates and enables their precise positioning. The product is also equipped with a power and energy monitoring function. Roller shutters, etc. can be integrated into automatic sequences and scenes and/or controlled as a group via the Z-Wave network in connection with Yubii Home. It is also possible to manually control the blinds with a conventional wall switch/push-button to which Roll-Control is directly connected.

works with
Yubii Home
Yubii Home Pro

Properties

– For integration into Yubii Home: automatic sequences, scenes, control by app on your smart phone and tablet
– Use with single-phase AC motors with electronic or mechanical limit switches
– Works with different types of switches – push-buttons, toggle switches, three-way switches etc.
– Function for active power and energy measurement
– Z-Wave signal repeater
– Supports the following Z-Wave network security modes:
  • S0 with AES-128 encryption
  • S2 with PRNG-based encryption

	Roll-Control
Item number	3016 1823 0301

Technical data

Power supply	100 – 240 V ~ 50/60 Hz
Rated load current (A)	1.7 (Resistive loads) for motors with compensated power factor (inductive loads)
Ambient operating temperature (°C)	0 to +35
Supported motor types	Single-phase AC motors
Limit switches required	Electronic and mechanical
Power consumption (W)	up to 0.8
For installation in wall switch boxes (mm)	Ø ≥ 50 Depth ≥ 60
Radio frequency (MHz)	868.4 or 869.8 (EU)
Conformity with EU directives	RoHS 2011/65/EU RED 2014/53/EU
Range (m)	up to 30 (in buildings)
External dimensions L x W x H (mm)	42.5 x 38.25 x 20.3

elero
On/Off-Control
Flush-mounted switch control

works with
Yubii Home
Yubii Home Pro

On/Off-Control is used to switch up to two electrical appliances and lights on and off and to measure the current and energy consumption. Electrical appliances can be integrated into automatic sequences and scenes and/or controlled as a group via the Z-Wave network in connection with Yubii Home. The compact size of the unit makes it the smallest of its kind and allows the product to be installed in wall switches or enclosures. On/Off-Control can be controlled with a directly connected wall switch or push-button.

Properties

– To control two electrical consumers
– For integration into Yubii Home: automatic sequences, scenes, control by app on your smart phone and tablet
– Active power and energy measurement
– Z-Wave signal repeater
– Works with different types of switches – push-buttons, toggle switches, three-way switches etc.
– Supports the following Z-Wave network security modes:
  • S0 with AES-128 encryption
  • S2 with PRNG-based encryption

On/off switch | Light management | Device management | Energy consumption meter

Compatible with various wall switches

Dimmer-Control

Flush-mounted light switch control

works with
Yubii Home
Yubii Home Pro

Dimmer-Control is used to control different types of light sources. The lighting can be integrated into automatic sequences and scenes and/or controlled as a group via the Z-Wave network in connection with Yubii Home. It can also be operated with the directly connected wall switch. The Dimmer-Control algorithm for intelligent light source detection facilitates configuration and ensures high compatibility of the device. It has an automatic overload protection cut-off and soft-start function (can be combined with LED Adaptor).

Properties

– Intelligent light source detection
– For integration into Yubii Home: automatic sequences, scenes, control by app on your smart phone and tablet
– Active power and energy measurement function
– Works with different types of switches – push-buttons, toggle switches, three-way switches etc.
– Soft start function
– LED diode signalling for different statuses: inclusion, calibration and device menu position
– Advanced configuration options
– Z-Wave signal repeater
– Can be operated without a neutral conductor
– Dimmable control of:
  • 230 V-operated conventional incandescent lamps and halogen light sources
  • 12 V-operated ELV halogen lamps and dimmable LED lamps (with electronic transformers)
  • 12 V-operated MLV halogen lamps (with ferromagnetic transformers)
  • Dimmable LED lamps and dimmable compact fluorescent lamps CFL
– Non-dimmable control of:
  • Compact fluorescent lamps CFL with electronic ballast
  • Fluorescent lamps CFL with electronic ballast
  • LED lamps (power factor > 0.7)

	Dimmer-Control
Item number	3016 1813 0301

Technical data

Power supply	100 – 240 V ~ 50/60 Hz
Energy consumption (W)	< 1.3 W
Ambient operating temperature (°C)	0 to +35
Betriebsstrom (A)	0.25 – 1.1
For installation in wall switch boxes (mm)	Ø ≥ 50 Depth ≥ 60
Radio protocol	Z-Wave
Radio frequency (MHz)	868.4 or 869.8 (EU)
Radio transmission power (dBm)	up to 6 (EIRP)
Conformity with EU directives	ROT 2014/53/EU RoHS 2011/65/EU

LED Adaptor
Flush-mounted light dimmer

Only in conjunction with Dimmer-Control!

The LED adaptor is a device that has been developed to expand the Dimmer-Control. It enables light sources to be dimmed with minimum power consumption and prevents flickering of LED lamps or afterglow of energy-saving lamps. It is only possible to dim light sources that are clearly marked as dimmable.

Properties

– Dimming of light sources
– Minimum power consumption of the light sources
– Prevents flickering and afterglow of LED equipment (in combination with Dimmer-Control, p.154)

Smart-Control

Intelligent radio receiver

works with
Yubii Home
Yubii Home Pro

Smart-Control extends the functionality of wired sensors and other devices and makes them "smart". They can be integrated into automatic sequences and scenes and/or controlled as a group via the Z-Wave network in connection with Yubii Home. In addition to wireless communication, devices, for example, can be switched on/off and data from sensors can be read out. The original functions of the device/sensor are not impaired by Smart-Control. The intelligent radio receiver can therefore also be used with alarm systems.

Properties

– Enables the connection of sensors:
  up to six DS18B20 sensors, one DHT sensor, two dual-wire analogue sensors, two triple-wire analogue sensors, two binary sensors
– Built-in temperature sensor
– Z-Wave signal repeater
– Supports the following Z-Wave network security modes:
  • S0 with AES-128 encryption
  • S2 with PRNG-based encryption

	Extension of the range of Z-Wave networks	Reading out data from sensors	Wireless communication	Switching devices on and off

	Smart-Control
Item number	3016 1704 0301

Technical data

Power supply (V DC)	9 – 30 (±10 %)
Inputs	Two 0-10 V or digital inputs One serial single-wire input
Outputs	Two potential-free outputs (for controlling external circuits)
Supported digital sensors	6 x DS18B20 or 1 x DHT22
Maximum output current (mA)	150
Maximum output voltage	30 V DC / 20 V AC (±5 %)
Ambient operating temperature (°C)	0 to +40
Radio protocol	Z-Wave (500 series chip)
Radio transmission power (dBm)	max. 7 (EIRP)
Radio frequency (MHz)	868.4 or 869.8 (EU)
Conformity with EU directives	RoHS 2011/65/EU RED 2014/53/EU
Range (m)	Up to 50 outdoors Up to 40 in buildings (depending on the terrain and building structure)
Dimensions L x W x H (mm)	29 x 18 x 13

RGBW-Control

Flush-mounted light and sensor control

RGBW-Control is used to control light sources, such as LED strips and coloured LEDs, and allows the light intensity and light colour to be changed. They can be integrated into automatic sequences and scenes and/or controlled conveniently by the Yubii app on your smart phone or tablet via the Z-Wave network in connection with Yubii Home. In addition, the device supports up to four analogue sensors and has a function for power and light measurement.

works with
Yubii Home
Yubii Home Pro

Properties

– For LED strips, RGB/RGBW LEDs and 12 V-operated or 24 V-operated light sources
– Control of light intensity and light colour, on/off
– For integration into Yubii Home: automatic sequences, scenes, control by app on your smart phone and tablet
– In addition, up to four 0 – 10 V analogue sensors are supported (e.g. temperature sensors, humidity sensors, wind sensors, air quality sensors, light sensors)
– All IN and OUT connections can be configured by the user for LED control or 0 – 10 V signal output
– Can be used as a dimmer in combination with halogen lamps
– Measurement of the current and historical power consumption starting at the installation
– Control via any Z-Wave controller possible
– Microprocessor-controlled
– For installation in standard wall switch boxes
– Z-Wave signal repeater

	RGBW-Control
Item number	3016 1713 0301

Technical data

Power supply (V DC)	12 / 24 (± 10%)
Rated load current (A)	6 per channel 12 in total for all outputs
Power (W)	144 combined at 12 V 288 combined at 24 V
Ambient operating temperature (°C)	0 to +40
Radio protocol	Z-Wave (500 series chip)
Radio frequency (MHz)	868.4 or 869.8 (EU)
Radio transmission power (dBm)	up to -1 (EIRP)

Heat-Control Kit

Intelligent radiator control

Heat-Control   Temperature sensor

A smart radiator thermostat and a temperature sensor are included in the Heat-Control kit. The temperature measurement sensor can be placed anywhere in the room. The heat level is automatically adjusted. An innovative room analysis algorithm calculates the time needed to reach the desired temperature based on the room volume. Heat-Control can be controlled manually, by voice command and app at any time. A schedule mode enables temperature management for the whole week. The heating can be integrated into automatic sequences and scenes via the Z-Wave network in connection with Yubii Home.

	Heat-Control Kit
Item number	6125

Technical data of Heat-Control

Power supply (V)	3.7 Li-poly rechargeable battery (not replaceable)
Charging connection	Micro-USB
Charger voltage (V DC) (charger not included in scope of delivery)	5
Minimum charging current (A)	0.5
Ambient operating temperature (°C)	0 to 40
Supported valves	M30 x 1.5, Danfoss RTD-N, Danfoss RA-N
Maximum water temperature (°C)	90
Accuracy of the temperature measurement (°C)	0.5 (within a range of 0 to 40)
Radio protocol	Z-Wave (500 series chip) (S2-capable)
Radio frequency (MHz)	868.0 – 868.6
Conformity to standards	RoHS 2011/65/EU, RED 2014/53/EU
Range (m)	up to 40 (depending on building structure)
Dimensions Ø x H (mm)	56 x 74 (without adapter), 56 x 87 (with adapter)

Technical data of temperature sensor

Power supply (V)	3.0 CR2032 battery (included in scope of delivery)
Radio frequency (MHz)	2402 – 2480
Max. transmission power (dBm)	max. 1
Ambient operating temperature (°C)	0 to +40
Conformity to standards	RoHS 2011/65/EU, RED 2014/53/EU
Dimensions Ø x H (mm)	38 x 12

Climate-Control

Thermostat for infrared control of split air conditioning systems

Clima-Control is a thermostat with an innovative design, developed to control split air conditioning systems by receiving Z-Wave commands and converting them into infrared commands. The intuitive display allows the temperature in each room to be read and easily controlled at the touch of a button. Clima-Control can be used as a zone thermostat and offers the possibility to control heating and cooling individually according to needs and habits.

works with
Yubïï Home
Yubïï Home Pro

Properties

– Supports S2 encryption
– Can be operated in stand-alone mode
– Functions for heating / cooling / automatic mode / Ventilation / dehumidification depending on the operating modes of the air conditioners
– Equipped with rechargeable battery for easy transportation

Control system for split air conditioners / Precise temperature measurement / Humidity sensor / Operation via app

Fan 2-Control

3-phase thermostat for controlling the radiator temperature

Fan-Control is an innovative thermostat for measuring and controlling the internal temperature of fan coil units. It is also ideal for offices or second homes, as it automatically regulates the fan speed based on the temperature difference, the programmed heating hours or manual inputs. For fan coil units with 2 pipes.

works with
Yubii Home
Yubii Home Pro

Properties

– Capacitive buttons
– Panel made of tempered glass, housing made of PC alloy
– Precise temperature setting function
– Non-volatile memory; operating status is stored even in the event of a power failure
– Electric valve (ball valve) or air valve with intelligent on/off control
– Simple assembly of the rear panel of the steel frame

Motion-Control

Motion, light and temperature sensor

The multi-sensor detects motion and measures the ambient temperature and light intensity. Any tampering of the device is detected by the integrated accelerometer. Motion-Control is battery operated and can be quickly and easily mounted on walls and ceilings or simply set up. Sensor signals can be integrated into automatic sequences via the Z-Wave network in connection with Yubii Home. Motion-Control can also be used for lighting scenes and security monitoring systems. Motion signals to the smartphone are also possible. The LED indicator is used to signal motion and the temperature level and operating mode.

	Motion-Control
Item number	3016 1774 0301

Technical data

Power supply	CR123 A battery, 3.0 V DC (battery included in scope of delivery)
Rechargeable battery life	Approx. 2 years (with default settings)
Recommended installation height (m)	2.4
Ambient operating temperature (°C)	0 to +40
Measured temperature range (°C)	-20 to +100
Accuracy of the temperature measurement (°C)	0.5 (within range of 0 to +40)
Accuracy of the temperature measurement (LUX)	0 to 32.000
Radio protocol	Z-Wave
Radio frequency (MHz)	868.4 Mhz or 869.8 MHz (EU)
EU directive conformity	RED 2014/53/EU RoHS 2011/65/EU
Range (m)	up to 50 outdoors up to 40 in buildings (depending on the terrain and building structure)
Dimensions H x W x Ø (mm)	46 x 46 (mounting bracket +2 mm)

Yubii Home
Yubii Home Pro

Properties

– Detects even the slightest changes in motion and temperature
– Unique earthquake detection function
– For integration into Yubii Home: automatic sequences and lighting scenes
– Easy to attach to surfaces, ceilings or walls thanks to innovative mounting bracket
– Used indoors
– Motion notification on your smart phone (can be deactivated)
– LED indicator (motion, operating mode, temperature level) that can be switched off
– Battery operated
– Wireless communication via Z-Wave protocol
– Wireless software update
– Supports the following Z-Wave network security mode:
  • S0 with AES-128 encryption

Motion sensor   Light sensor   Temperature sensor   Acceleration sensor

Direct notification

elero

Smoke-Control

Smoke sensor

Smoke-Control signals an alarm by sound and visual flashing and by sending Z-Wave control commands. The optical sensor already detects smoke at an early stage of the fire. In addition, the device has a built-in, programmable temperature sensor. Smoke-Control can be mounted on a wall or ceiling. The LED indicator signals fires and the operating mode and can be used to see if the device is within a Z-Wave network.

	Smoke-Control
Item number	3016 1734 0301

Technical data

Battery type (V DC)	CR123 A 3.0 (included in scope of delivery)
Ambient operating temperature (°C)	0 to +55
Operating humidity (%)	0 to 93
Measured temperature range (°C)	-20 to +100
Accuracy of the temperature measurement (°C)	0.5 (within 0 to +55)
Sensitivity to smoke	First level - 1.20 +/- 0.5% obs/ft Second level – 1.80 +/- 0.5% obs/ft Third level – 2.80 +/- 0.5% obs/ft
Noise level of the alarm siren (dBA)	85 (at 3 metres)
Radio transmission power (dBm)	up to -5 (EIRP)
Radio protocol	Z-Wave
Radio frequency (MHz)	868.4 or 869.8 (EU)
Conformity with EU directives	EN 14604:2005 RED 2014/53/EU RoHS 2011/65/EU
Range (m)	up to 50 outdoors up to 30 in buildings (depending on the terrain and building structure)
Dimensions Ø x H (mm)	65 x 28

Included in this kit:

🔒 **Safety**
Page 153

works with
Yubii Home
Yubii Home Pro

Properties

– Optical smoke detection
  (already at a very early stage of the fire)
– Integrated temperature sensor (signals when a defined temperature threshold is exceeded)
– Alarm is signalled by loud noises, visual display and the transmission of Z-Wave control commands
– Smoke-Control can be integrated into automatic processes via the Z-Wave network in connection with Yubii Home – alarm scene: e.g. opening roller shutters, switching on light, message on the smart phone
– Battery operated
– Compact, attractive design
– Three sensitivity levels of the sensors according to EN 14604:2005
– Built-in detector for housing opening
– Built-in Z-Wave range tester
– Wireless software update
– Self-test function, which can also be performed manually to test the operation of the Smoke-Control
– Efficiency test is automatically carried out every ten seconds to detect potential malfunctions
– Supports the following Z-Wave network security mode:
  • S0 with AES-128 encryption
– Not suitable for installation near moisture or dust

CO Alarm-Control

Compact carbon monoxide detector

Thanks to its high sensitivity, CO Alarm-Control detects the presence of carbon monoxide (CO) gas at an early stage to prevent carbon monoxide poisoning. The alarm is signalled with a built-in siren, a flashing LED indicator and by sending information to Z-Wave network devices. In addition, the device is equipped with a temperature sensor. In connection with Yubii Home, the carbon monoxide concentration is displayed in a graph and stored in the system memory. This allows the amount of CO in rooms to be monitored to prevent health restrictions in the long term.
Only suitable for wall mounting.

Properties

– Carbon monoxide (CO) detection
– Integrated temperature sensor
– Detects even low CO concentration levels
– Alarm is signalled with a built-in siren and LED diode
– Alarm-Control can be integrated into automatic sequences via the Z-Wave network in connection with Yubii Home – for example as a message on your smart phone
– Can be used as a stand-alone carbon monoxide detector
– Supports the following Z-Wave network security mode:
  • S0 with AES-128 encryption
– Battery operated
– Only suitable for wall mounting

	CO Alarm-Control
Item number	3016 1643 0301

Carbon monoxide sensor	LED light display	Temperature sensor	Audible alarm

Technical data

Battery type	CR123 A 3.0 V (battery included in scope of delivery)
Service life under typical conditions	8 years
Measurement range of CO concentration (ppm)	0 to 450
Measurement accuracy	± 10 ppm / ± 5 %
Ambient operating temperature (°C)	0 to +50
Alarm response times with default settings	50 ppm 60 – 90 min 100 ppm 10 – 40 min 300 ppm <1.5 min
Noise level of the alarm siren (dBA)	85 (at 3 metres)
Radio transmission power (dBm)	up to -5 (EIRP)
Radio protocol	Z-Wave (500 series chip)
Radio frequency (MHz)	868.4; 868.42 or 869.8 (EU)
EU directive conformity	RED 2014/53/EU RoHS 2011/65/EU EN 50291-1:2010
Range (m)	Up to 40 in buildings (depending on the terrain and building structure)
Dimensions Ø x H (mm)	65 x 28

elero

Flood-Control

Flood and temperature sensor

works with
Yubii Home
Yubii Home Pro

The multifunctional sensor is more than an ordinary water detector – it detects the smallest water leaks and the integrated temperature sensor monitors the temperature of the floor, for example, or issues an alert in the event of a fire. Flooding is signalled by the integrated LED and audible alarm. Sensor signals can be integrated into automatic sequences via the Z-Wave network in connection with Yubii Home. Due to its compact size, Flood-Control can be positioned anywhere – this is possible on walls due to an extended flood sensor probe.

Properties

– Detects water leaks, floods and fires
– Flood-Control can be integrated into automatic sequences via the Z-Wave network in connection with Yubii Home
– Built-in LED and audible alarm
– Compact design, floatable sensor
– Placement on the floor
– Wall mounting with extended flood sensor probe (wired)
– Can communicate with wired alarm systems via a Z-Wave network
– Battery operated or VDC operated
– Wireless software update

	Flood-Control
Item number	3016 1723 1201

Flood sensor	Acoustic / visual alarm	Temperature sensor	Tamper protection

Technical data

Battery type	CR 123 A (included in scope of delivery)
Power supply (V DC) (optional)	12 – 24
Maximum voltage at the output terminals (V)	24 DC / 20 AC
Measured temperature range (°C)	0 to +40 (battery operation) -20 to +100 (VDC operation)
Accuracy of the temperature measurement (°C)	0.5 (within a range of 0 to 40)
Ambient operating temperature (°C)	0 to +40 (battery operation) -20 to +70 (VDC operation)
Radio protocol	Z-Wave
Radio frequency (MHz)	868.4 or 869.8 (EU)
Conformity with EU directives	RoHS 2011 / 65 / EU RED 2014 / 53 / EU
Range (m)	up to 50 outdoors up to 40 indoors (depending on the terrain and building structure)

D/W-Control

Contact sensor with temperature measurement

Sustainability
Page 151

works with
Yubii° Home
Yubii° Home Pro

D/W-Control is a wireless, battery-operated magnetic contact sensor. The opening is detected by separating the sensor body and the magnet. The sensor can be used in connection with Yubii Home to trigger scenes and wherever information about the opening or closing of doors, windows, garage doors etc. is required. In addition, D/W-Control is equipped with a built-in temperature sensor.

Properties

– For windows, doors, gates, roller shutters
– The opening is detected by separating the sensor body and the magnet
– Built-in temperature sensor
– D/W-Control can be integrated into automatic sequences via the Z-Wave network in connection with Yubii Home – for example to turn down the heating when the window is open
– Battery operated
– Detects any tampering when removing or opening
– Easy to install
– Visual LED indicator for visualisation of the device status
– For use inside buildings only
– Supports the following Z-Wave network security mode:
  • S0 with AES-128 encryption

Plug-Control

Plug & Play

works with
Yubii Home
Yubii Home Pro

Plug-Control is an intelligent plug & play socket adapter with current measuring function. It can be used wherever electrical appliances with a maximum power of 2.5 kW need to be controlled, while monitoring the power consumption conveniently and maintenance-free. The crystal LED ring informs about the current load of the connected device by changing its colour visually. In connection with Yubii Home, the plugged-in device can become part of scenes or sequences and be operated with the Yubii app or a voice command.

Properties

– For lamps, fans, household appliances, coffee machines, home entertainment and other devices
– Can be used also as a night light
– Thanks to Plug-Control, the devices can be integrated into scenes and automatic sequences and switched on and off via Yubii Home
– Also useful if the socket is difficult to access (switched on and off with the app)
– Visualisation of the power consumption by coloured crystal LED ring (microprocessor-controlled)
– History and statistics on power consumption can be visualised via Yubii Home
– Extremely compact and can be remote controlled
– Supports the following Z-Wave network security mode:
  • S0 with AES-128 encryption

	Plug-Control
Item number	3094 0383 0301

Technical data

Power supply (V AC)	230V AC 50/60 Hz
Rated operating output voltage (A)	11
Power consumption (W)	up to 1.6
Output power for resistive loads (kW)	2.5
Conformity to standards	RED 2014/53/EU RoHS 2011/65/EU
Ambient operating temperature (°C)	0 to +40
Compatible with type F sockets (Schuko)	CEE 7/16 (max. load of 2.5 A) CEE 7/17 (max. load of 11 A) Double plug F
Radio transmission power (dBm)	up to -10 (EIRP)
Radio protocol	Z-Wave
Radio frequency (MHz)	868.4 or 869.8 (EU)
Range (m)	Up to 50 outdoors Up to 30 in buildings (depending on the terrain and building structure)
Dimensions Ø x H(mm)	43 x 65

On/off switch Energy meter Power measurement Protection against fluctuations

For loads other than resistive loads, please observe cos ɸ and use a lower load than the nominal load if necessary. It is not recommended to exceed 3 A for 250 V AC, cos ɸ=0,4.

Push-Control

Switches for electrical appliances and scenes

The practical scene switch Push-Control switches electrical appliances on and off and, in connection with Yubii Home, is able to trigger scenes. Up to six different actions or scenes can be carried out with Push-Control. In panic mode, each press of the button triggers the emergency scene. Thanks to its small design and wireless communication, the Push-Control can be conveniently placed on any surface and mounted in any position, e.g. next to the bed or under the desk.

Push-Control	white	black	red
Item number	3016 1684 0301	3016 1674 0301	3016 1664 0301

Technical data

Battery type	ER14250 ½AA, 3.6V DC (included in scope of delivery)
Rechargeable battery life	Approx. 2 years (with default settings and max. 10 operations/day)
Ambient operating temperature (°C)	0 to +40
Radio protocol	Z-Wave (500 series chip)
Radio transmission power (dBm)	up to 1 (EIRP)
Radio frequency	868.4 or 869.8 (EU)
Conformity to standards	RED 2014/53/EU RoHS 2011/65/EU
Range (m)	Up to 50 outdoors Up to 40 in buildings (depending on the terrain and building structure)
Dimensions Ø x H (mm)	46 x 34

Included in this kit[1]:

Living comfort
Page 149

works with
Yubii Home
Yubii Home Pro

Properties

– Switch for six actions
  (one to five clicks and hold)
– Integrated in Yubii Home, scenes can be triggered and messages sent to a smart phone, for example
– Can be used as a panic button
– Supports the following Z-Wave network security mode:
  • S0 with AES-128 encryption
– Wireless, battery-operated Z-Wave communication
– Can be installed in any position in your house
– Can be placed on surfaces without mounting
– Easy start-up via Yubii Home
– Three colour variants (white, black, red)

×1   ×2   ×3   ×4   ×5   ↓
Several clicks activate different created scenes.

HubNetworklink

Cable set for connecting Yubii Home and Home Center 3 Lite to the Internet (LAN) and to the power socket

works with

Yubii Home

The HubNetworklink cable set makes it easier to install Yubii Home wherever the Wi-Fi signal is weak or unavailable.
It requires no additional setup and guarantees a stable connection to a wired LAN network.

Properties

– Install Yubii Home by connecting the smart home hub with the LAN cable
– Use the device in a room where Wi-Fi is not available or where the signal is weak or unstable
– HubNetworklink has a single micro-USB port that supplies power and internet connection with integrated LEDs indicating LAN connection status
– The Ethernet cable and all necessary cables are included

	HubNetworklink
Item no.	3012 1051 0101

Technical data

Interface	Micro USB, USB Type A, Ethernet RJ-45
Ethernet cable	Cat 5e U/UTP, length 1 m
Dimensions (mm)	59 x 25 x 18 and a cable length of 96 cm

Power supply | Internet connection | Integrated LEDs | Ethernet cable

MyEye Bullet Lite

High-resolution wireless IP camera for universal use

MyEye Bullet Lite is a universal wireless IP camera designed to meet the typical day-to-day needs of your home. The MyEye Bullet Lite video camera works in stand-alone mode, but can also be connected to the Yubii ecosystem.

Properties

– Observe the monitored area live in 4 MP high resolution even at night, thanks to the IR diodes with a range of up to 30 m
– Store your data with the MyEye Recorder series recorders or an SD card
– Communicate with people near the installation site (built-in loudspeaker and microphone)
– Thanks to the built-in WiFi, you can install the camera in a location without cables: all you need is the power supply unit (included with the camera)

	MyEye Bullet Lite
Item no.	4095 0002 0109

MyEye Dome

High-resolution IP camera with advanced image analysis

works with
Yubii Home
Yubii Home Pro

MyEye Dome is a latest generation IP camera designed for active monitoring of areas requiring special attention with the best possible quality. The MyEye Dome video camera works in stand-alone mode, but can also be connected to the Yubii ecosystem.

Properties

– Observe the monitored area live in 5 MP high resolution colour both day and night
– Store your data with the MyEye Recorder series recorders or an SD card
– Keep potential intruders away with light and sound alarms
– Minimise the number of false alarms (SMD - Smart Motion Detection)
– Communicate with people near the installation site (built-in loudspeaker and microphone)

	MyEye Dome

MyEye Video Rec 4

High-resolution universal IP video camera

works with
Yubii Home
Yubii Home Pro

MyEye Video Recorder Lite is a compact professional recorder specifically designed to manage and store recordings from MyEye series IP cameras.
The MyEye Video Rec 4 recorder is an essential element of the surveillance system and can also be connected to the Yubii ecosystem.

Properties

– Watch live camera footage on your TV, monitor or display device with HDMI or VGA input
– Manage the video cameras connected to the recorder together and archive the recordings from the video cameras thanks to the optional hard disk
– Communicate with people in the vicinity of the installation site (loudspeaker and microphone are integrated)
– Power your MyEye series cameras thanks to the 4 PoE ports

	MyEye Video Rec 4

The home becomes smart

Centero Home NXT is the ideal introduction to the Smart Home world. The monitoring, control and automation of home automation products is possible by radio control (868 MHz, 433 MHz), IP and infrared. Centero Home NXT can be used both in the cloud and locally in a WLAN. All functions related to sun protection and roller shutter control are covered. In addition, home automation and security components as well as lifestyle products from other manufacturers can be integrated

elero

Centero Home NXT

Central home automation from elero – Smart control for increased living comfort.

CENTEROHOME **NXT**
by elero

All functions relating to sun shading and roller shutter control are covered. In addition, home technology and security components as well as various lifestyle products from other manufacturers can also be integrated.

Centero Home NXT	
Item no.	288060001

Technical data	
Rated voltage (V)	5 DC / 1,5 A
Power consumption (W)	1.3
Ambient operating temperature (°C)	0 to +40
Radio frequency (MHz)	433 / 868
Dimensions L x B x H (mm)	110 x 110 x 32
Network	WLAN IEEE 802.11 /b/g/n, 2.4 GHz
Radio transmission range (m)	> 100 (free field)
Radio transceiver	1 x transceiver for 433 MHz & 1 x transceiver for 868 MHz &
Infra red (IR)	Integrated 38 KHz IR receiver and transmitter unit (36 – 455 KHz)
Connections for External IR transmitter	2 x 3.5 mm jack socket, addressable (rear)
IR to radio connector	Triggering a radio command by means of IR remote control
RGB LED Indicator (top side)	Programmable, for device status display
Bidirectional radio (868 MHz)	•
Learning functionality	Radio and IR
Product contents	Centero Home Gateway, mains plug

For a complete list of Centero Home NXT compatible control systems and devices, visit **www.elero.com/centerohome**

Properties

– Simple and intuitive operation of home technology by smartphone or tablet
– Locally in the WLAN and remotely via the cloud
– Für mehr Sicherheit und Energieeffizienz
– Controllable with Centero Home NXT:
  • Complete privacy and sun protection with elero radio drives and receivers
  • Radio-controlled socket outlets, lighting and heating elements with elero radio receivers
  • Motion and smoke detectors, window contacts, radiator thermostats and temperature sensors from Homematic
  • Lighting systems from Philips Hue
  • Simple commissioning by specialised tradesman possible without access to the customer's WLAN
  • Calendar function, daily schedules, manual/automatic switchover, scene control, display of critical devices, favourites, action lists, use of different configurations per user, optional cloud backup
  • In-app upgrade to the Centero Home Plus version:
    – Amazon Alexa voice control
    – Integration of Sonos sound systems
    – Integration of Netatmo weather stations
    – Visitor management with Doorbird door intercoms

Hand-held radio transmitters

Radio technology for roller shutters, awnings, roller blinds and venetian blinds bring more convenience to your own four walls. With a hand-held radio transmitter from elero, roller shutters, awnings and much more can be controlled very conveniently, for example from your sofa, bed or anywhere else in your house.

The hand-held radio transmitters impress with their modern design and their ergonomic, user-friendly construction.
Your specialist can carry out the installation of the control components at any time without any dirt and time-consuming assembly.

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components

(transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

Application areas

The hand-held radio transmitters from elero offer an ideal control solution for dedicated drive technology, such as roller shutters, sun protection systems and doors, as well as for heating systems, lighting installations or other electrical consumers. Operation of one or more applications is carried out simply at the touch of a button or is completely automated.

Radio transmitters

Increase your living comfort with radio transmitters from elero, which can be installed at the desired location independently of the mains supply. The range includes single-channel and multi-channel radio wall transmitters as well as modules for subsequent automation.

This allows, among other things, sun protection systems to be operated either manually, on demand or automatically.

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components (transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

elero

Application areas

elero offer a wide range of radio transmitters that can be used in a variety of applications.
In addition to controlling roller shutters, sun protection systems and doors, it is also possible
to integrate heating systems, lighting installations and many other electrical applications.

Radio receivers

Radio receivers enable flexible and automatic control of numerous devices. The extensive range from elero offers the right solution for everyone – whether integrated in the radio transmitter or for retrofitting a wired wall transmitter. Increase your living comfort and security and use the full possibilities of an automated home.

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components (transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

Application areas

elero offer numerous control solutions. Both for dedicated drive technology, such as roller shutters, sun protection systems and doors, as well as for heating systems, lighting installations or other electrical consumers. Regardless of whether wired or radio-controlled – operation is very simple at the touch of a button or completely automated.

[1] **Running modes: RM (tubular drives)**
– Immediate maintained mode, runtime of two minutes (Revio-SW: five minutes); 2 intermediate positions can be stored and approached by double-clicking (up/down button). If no positions are stored, the end positions are approached

JA (venetian blind drives)
– Dead man's mode, maintained mode after two seconds of pressing the button, runtime of three minutes (Revio SW 5 minutes); 2 intermediate positions can be stored. Double-click on the down button to move to the down position and then to the distance time for the up intermediate position. If you double-click on the up button, only the distance time is run in upward direction. If no positions are stored, the end positions are approached.

PU (pulsable drives)
– Defined, adjustable pulse time, maintained mode after two seconds of pressing the button, runtime of three minutes

GY
– Short pulse signals for controlling ProLine devices at low-voltage input
– Retrofitting of existing ProLine or WKS control systems to the current elero radio standard without removing the devices

SW (light control)
– Light switch function, runtime unlimited, until opposite direction or stop is activated

HE (heating function)
– Dimmability of 0, 33, 66 and 100% for radiant heaters; intermediate positions/stages are programmed to fixed values and can be deactivated; intermediate positions/stages can be approached or activated by double-clicking (up/down).

LI (light function)
– Dimmability from 0 to 100%; lowest level can be limited; two intermediate positions/stages can be freely programmed and approached or activated by double-clicking (up/down button). Intermediate positions/stages can be deactivated to maintain the device functionality as in SW mode

Wireless sensors from elero enable weather-dependent operation of a wide range of applications in your home. No matter whether it is sunny, windy or rainy by

checking ambient values such as brightness, wind strength and humidity, your home reacts to changes in the weather at any time without you having to intervene.

Bidirectional routing with ProLine 2

ProLine 2, the bidirectional radio system from elero, is more reliable, powerful and transparent than unidirectional radio standards.
At the heart of the technology (868 MHz) are bidirectional radio components

(transceivers) that are capable not only of receiving, but also of confirming and relaying the signals. As soon as a command has been executed on the drive, the user receives feedback and can be sure that the commands are being executed correctly.

Application areas

Wireless sensors from elero make your home even more comfortable. The range of applications includes both the control of privacy and sun protection elements as well as the control of many other applications. Wireless sensors are also suitable for retrofitting existing applications. For example, awnings with a built-in radio receiver can be automated at a later date.

Wired control units – Wall-mounted units

The control units of the ProLine generation open and close roller shutters and sun protection systems automatically over time and offer you perfect living comfort. Technical perfection, high standards of quality and innovative design characterise these control systems. They also offer straightforward operation, large push buttons and a clear display. A modular design of the individual control components allows for a wide variety of control options. Needless to say that the wall-mounted units are easy to connect and compatible with many standard switch ranges with the aid of an adapter frame.

Application areas

In addition to interior and exterior shading, the wall-mounted devices from elero can also be used to control lighting. With both wired and radio-controlled wall-mounted devices, a wide range of applications can thus be operated at the touch of a button or even completely automatically.

Sensors

Drives and control systems are the central automation elements - but only with the right accessories can specialist trades and the industry develop solutions for complex requirements. That is why elero offer a number of sensors ranging from simple sun sensors to sophisticated weather monitors. Solar radiation, wind strength and precipitation

are monitored in this way. In addition to wired sensors, which are mainly in demand for new buildings, the product range also includes radio variants: They are characterised by quick and uncomplicated installation and are therefore often used for retrofitting.

Application areas

Sensors from elero make your everyday life easier in many situations. Roller shutters as well as awnings and venetian blinds can be controlled very easily. Your shading systems respond automatically to changes in the environment without you having to intervene.

More home comfort

Sun and light penetration make a decisive difference to the ambience, your feeling of well-being and thereby also your quality of life. Light sensors regulate how much daylight to let in and prevent disruptive mirroring effects and glare. Rooms are put into the "right light" – fully automatically.

Relay and special control systems

For some applications, it is necessary to control several drives together with a single switching point. This is easy to implement with appropriate relay or control units.

The prescribed second escape route is often via patio doors. If an automatic privacy and sun protection screen is there, it must quickly clear the escape route in an emergency. elero have suitable control systems for this purpose too.

Application areas

Relay and special control systems from elero can be used individually for interior and exterior shading. The solutions for the second escape route enable your applications to be moved even in the event of a blackout so that you can safely leave your home at any time.

ExitSafe

Solutions for the second escape route

Push button or maintained mode operation, single or central operation priority, roller shutter or venetian blind operation, warning signal at low charge level, automatic upward travel at low charge level (can be deactivated), warning signal after 2 years or 500 charging cycles (can be deactivated), control units with automatic commands can be integrated.

ExitSafe	
Item number	283880001

Technical data	
Rated voltage (V AC)	230 / 50 Hz
Output voltage (V DC) motor terminals	8.4...12
Motor terminals / maximum current (A)	4
Output voltage for control elements (V DC) / nominal current (mA)	8.4...12 / 50
Battery type	Li-Ion
Nominal battery capacity (mAh)	3.400
Max. control factor (sec./h)	1,200 / 8
Operating mode	Jog mode, maintained mode, delayed maintained mode
Protection class (IP)	20
Control module dimensions (mm)	67 × 40 × 22
Battery module dimensions (mm)	70 × 55 × 20
Type of mounting	In double electronic flush-mounted box
Bidirectional radio control (extendable)	•
Ambient operating temperature (°C)	±0 to +60
Standard scope of delivery	ExitSafe control module, battery module, connection cable for operating elements, operating instructions

Compatible accessories		Spare battery for ExitSafe module
Item number		283881201

Properties

– Smoke detector with NO or NC contact (NC contact with wire break detection) can be connected
– Individual operating input for push button or control system
– Central operating input for e.g. smoke detector or control system
– Priority can be configured
– Can be controlled directly with bidirectional radio transmitter in conjunction with VarioTec-868 DC (p. 237)

Can also be controlled by bidirectional radio control

When using the VarioTec-868 DC as a control unit, the existing privacy and sun protection can be operated by radio control even in the event of a blackout. Time and sun protection commands for the blinds can be activated or deactivated with the slide switch.

Central control units

For 1 or 2 AC motors

For up to 4 AC motors
Properties

– Operation of several drives from one switching point with a venetian blind push button or switch is possible, as is automatic switching with ProLine control units and individual operation with a venetian blind push button.

– Observe the overall phase load when designing the complete system. The number of sequencing relays that can be switched sequentially depends on the current consumption of the motors used. The back-up fuse must not exceed a max. value of 10 A.

Central control unit (sequencing relay) for 1 or 2 single-phase motors

Item number	239940002

Central control unit for up to 4 AC motors

Item number	248160002

Technical data

Rated voltage (V)	1 ~ 230 – 240
Rated frequency (Hz)	50 – 60
Current consumption (mA)	10 in relay mode
Switching capacity	Max. 2 x 3 A, 250 V AC, max. motor load 2 x 690 VA, only for 230 V motors with end position switches
Protection class (IP)	20
Ambient operating temperature (°C)	0 to +60
Back-up fuse (A)	max. 10
Dimensions H x W x D (mm)	47 x 52 x 21

Intelligent door control systems

The DoorControl system for motorised roller garage doors, roller grilles or smal industrial roller doors has been developed specifically for AC tubular drives with mechanical limit switches.
It complies with the European standards "Safety in use of power operated doors" EN 12453 and EN 12445. It is also naturally CE compliant and certified by the TÜV.

Control system selection table for DoorControl

	DoorControl		
	for rolling doors		For roller grilles *2)
Control system selection	**Without radio control**	**868.8 MHz**	**Without radio control**
*1) Recommendations for doors shown below			
Doors for commercial and industrial use etc. Pulse control with or without sight of the door (maintained mode), automatic control with traffic lights	•	•	•
Rolling doors or roller grilles for underground garages etc. Automatic control / two-way traffic with red/green traffic lights	•	–	–
Features			
Automatic closing with traffic light function	•	•	•
Test of the opto-electronic door-edge security system for 8.2 KΩ resistance evaluation	•	•	•
*2) Test of the ingress protection system integrated	–	–	–
Automatic drive cut-out at the end positions	•	•	•
"CLOSED" light barrier connection	•	•	•
Connection of pre-end switch	•	•	•
Garage light connection	•	•	–
Integrated radio receiver FM 868.8 MHz	–	•	–
Connection of timer possible	•	•	•

*1) Please be sure to follow EN 12453!
  § 5.5. Table 1 – Observe "Minimum protection levels for security of main door-edge"!
  Maintained mode only if this represents no risk of injury or damage.
  Connection of protection systems is essential.

*2) Ingress protection unit with testing for roller grille can be connected
  Item no. 17 700.5401 light barrier test unit for 2 one-way light barriers, item no. 249610001 or 249600301 or
  requirements for the light barriers: 24 V DC voltage;
  power consumption </= 1.5 VA; ready delay 250 ms

DoorControl

Door control system for tubular drives

As long as stocks last!

For type 15 W NHK and NMA with mechanical limit switch
1 x 230 V / 50 Hz.

DoorControl

– Closing edge evaluation
– Dynamic motor runtime monitoring
– Output for interior light or also warning lights
– Automatic operation of door systems with
  230 V AC drives

DoorControl RG
– Suitable for roller grilles
– Draw-in protection testing possible
  by light barrier test unit

	DoorControl for rolling doors			DoorControl for roller grilles

Radio remote controls, 868.8 MHz

2-command radio receiver, 868.8 MHz in housing, 230 V AC

177004201
For downstream control systems: push-button, on/off switching operation, timer mode, switch-off delay up to 250 sec.

Rod antenna FM 868.8 MHz

177004901
For radio receiver 17 700.4201 50 ohms – coaxial cable (10.0 m)

4-command radio hand-held transmitter

177003701
Up to 50 m, environment-dependent, secure "SOMLOQ" rolling code system, 3 V battery, CR 2032, housing can be pulled out

Wall mount holder

177003901
For hand-held radio transmitter 17 700.3701

Safety for crushing, shearing and ingress points

Door-edge security system (opto-electronic safety edge)
147059002
Evaluation unit for 230 V/50 Hz mains voltage, switching contact potential-free (in plastic housing IP 66)

242750001
Transmitter, cable length of 1.0 m + receiver, cable length of 10.5 m, approx. range of 1.0 m - max. 8.0 m, Ø 11 mm

Line connection box
231730002
With strain relief for spiral cable, integrated plug-in/screw terminals incl. screwdriver

147052801
Spiral cable 3 x 0.5 mm² Extensible, 0.9 - 3.0 m

147062601
Safety edge rubber, double chamber with lip
147010602
Aluminium C-rail for safety edge rubber, 1.5 m long

232550002
Stoppers (pair)

Reflection light barrier with polarizer IP 67

249600201
Accessories: reflector, angle bracket, screw fitting and fixing screws on the holding bracket. Range: 0.50 ... 15.0 m; rated voltage: 15 - 45 V DC or 24 V AC; ready for operation: < 100 ms; rated current: max. 30 mA/24 V

> **Note:**
>
> The reflectors for the reflection light barrier can fog up outdoors due to weather effects, frost etc., thus drastically reducing their range. Recommendation: one-way light barriers are suitable outdoors even in tough conditions.

One-way light barrier IP 67

249610001
Set: transmitter, receiver and fastening part. Plastic housing. Range: max. 50.0 m; rated voltage: 20 - 230 V AC/DC. Output: relay
One way "Twin-Safe" light barrier

249600301
For ingress protection accessories: angle bracket

Range: 1.0 - 20 m, rated voltage: 10 - 30 V DC Opening angle: < 4°, rated current: 70 mA

Light barrier test unit

177005401
Function only with BoxCard premium and DoorControl for roller grilles for 2 one-way light barriers, item no. 249600301 or 249610001

Weather protection bonnets suitable for the angle brackets
143068501

30	60	65	60	56	51
40	60	86	80	75	68
50	60	108	100	93	85

The specified values take into account 15% friction.

Awnings and roller blinds

VariEco M NHK

| Torque | Speed | Shaft Ø | Tensile force at the shaft |
(Nm)	(Upm)	(mm)	(kg)
20	14	78	51
		85	47
30	14	78	77
		85	71
40	14	78	103
		85	94
50	14	78	128
		85	118

Important note:
Observe the permissible load of the winding shaft and the permissible size of the blind. These values are guide values! No liability can be accepted! You can obtain the data from the respective manufacturer. For an individual drive calculation, we recommend our drive calculation programme at www.elero.com.

Drives for marquisolettes, conservatory awnings, fabric tension systems etc. must be determined separately for each individual system.

Selection table for determining the suitable drive by the rated torque

Determine the required rated torque of the drive based on the system data!

Roller shutters and doors

Type 15 W / Type 15 W NMA

Torque	Shaft Ø	Nominal rod thickness	Maximum blind weight for a rolling door/shutter height in m up to		
			2.5	3.5	5.0
(Nm)	(mm)		(kg)		
120	133	19	138	130	117
	133	23	131	123	109
	168	19	115	113	117

150	133	19	172	162	146
	133	23	164	154	137
	168	19	144	141	133
	168	23	142	135	126
180	133	19	206	194	176
	133	23	196	185	164
	168	19	172	169	160
	168	23	170	162	151
230	133	19	264	248	224
	133	23	251	236	203
	168	19	220	216	204
	168	23	218	207	193
300	133	19	344	324	293
	133	23	327	308	273
	168	19	287	281	266
	168	23	284	270	252

This data refer to the complete roller shutter/door in kg, with 15% allowance for friction. The friction can be greater due to additional door seals, wind loads etc. Please make any necessary corrections.

Calculation of the average stroke speed in cm/sec.:

$$Vm = \frac{D + d \cdot 3.14 \cdot n}{2 \cdot 60}$$

Vm = average stroke speed in cm/sec.
D = bale diameter in cm.
d = tube diameter in cm.
n = revolutions per min.

These values are guide values. No liability can be accepted!

Venetian blinds

JA Soft / JAR Soft

____ Slat flanged; .... Slat without edging

JAe / JAdk / JA NHK / JARdk
____ Slat flanged; .... Slat without edging
Calculation basis	Slat with edging	Slat without edging
Width per slat (mm)	60 – 90	50
Winding pulley diameter (mm)	22	
Lift belt thickness (mm)	0.34	
Weight incl. bottom rail (kg/m2)	2,0	1.2

These values are guide values. No liability can be accepted!

Example for determining the rated torque and drive for a roller shutter:

1. Determining the roller shutter data (example)
– Winding shaft 60, octagonal
– Rod thickness: 14 mm
– Armour data: H 2.20 m x W 2.00 m = 4.4 m²
– Armour weight: 5 kg/m² x 4.4 m² = 22 kg

2. Determining the rated torque of the drive
A rated torque of 20 Nm is determined from the table column 2.50 m/14 mm.

3. Selecting the drive
Now select the corresponding drive type with the determined torque from the example:
RolTop M20-868

These values are guide values. No liability can be accepted!

Information

The information in the catalogue refers to the current production status of the devices. We reserve the right to make changes to the technology and design; colour deviations are possible and due to printing technology. No liability is accepted for printing errors and mistakes. elero also reserves the right to change both the product-related technical and business documents as well as their products at any time.

The dimensions listed are in millimetres unless otherwise stated. For further information on our products, please also refer to the technical documentation and instructions for use enclosed with them.

Our products may be processed only by authorised specialists; dangers and risks that are not insignificant may otherwise arise in the event of improper installation.

General terms and conditions

Terms and conditions of sale

§ 1 Scope of validity

1. Our terms and conditions of sale shall apply exclusively. They shall apply to this and all future transactions with the customer, unless expressly agreed otherwise between the parties. We do not accept any conflicting or deviating terms and conditions of the customer. The terms and conditions of business of the customer or third parties shall not apply even if their validity is not objected to in individual cases or if reference is made to a letter that contains or refers to the terms and conditions of business of the customer or a third party. Exceptions must be agreed in writing between the parties.

2. Unless otherwise stated in the terms of the contract, the terms and definitions of INCOTERMS 2010 shall apply. Þ

§ 2 Conclusion of contract

1. Our quotations are not binding. Likewise, technical descriptions and other details in brochures and other information are not binding unless they are expressly indicated as binding.

2. We reserve the copyright and proprietary rights to all samples, brochures, technical descriptions, calculations and other documents. They may be made accessible to third parties only with prior written consent.

3. The acceptance declaration and all confirmations must be in writing in order to be valid.

4. If the order is to be qualified as a quotation in accordance with § 145 BGB, we can accept this within 12 working days.

5. Information in samples, brochures, technical descriptions as well as in public statements on our part, by the manufacturer and their assistants (§ 434, para. 1, p. 3 BGB) is only part of the performance description if it is expressly referred to in the contract.

6. With the exception of the managing director and sales management, our (sales) employees are not authorised to make verbal ancillary agreements, make verbal agreements that deviate from these GTC or give verbal assurances that go beyond the content of the written contract.

§ 3 Prices and payment terms

1. The agreed prices shall apply. They are "ex works" plus packaging, statutory value added tax, customs duty for export deliveries as well as fees and other public charges including additional expenses such as those for the conclusion of insurance policies. The statutory value added tax shall be disclosed separately in the invoice at the statutory rate on the day of invoicing.

2. If the main cost components change before the delivery is supplied, there may be a price increase if the delivery or performance is provided more than four months after signing the contract. The price increase shall take into account the mutual interests of the contracting parties.

3. Invoice amounts are due immediately, as net amounts without deduction.

4. Any other forms of payment require a special written agreement. Any costs incurred by either side shall be borne by the customer. Payment by bill of exchange is excluded.

5. The customer shall have a right of set-off or a right of retention only with respect to undisputed or legally established claims or entitlements.

§ 4 Delivery and cooperation pledges ß

1. The scope of our delivery obligation results exclusively from the respective contract. We reserve the right to make changes to the design, shape and colour based on technological improvements or the requirements of the legislator insofar as the changes are not substantial or otherwise unreasonable for the customer.

2. We are entitled to make partial deliveries if:
   − The partial delivery is usable for the customer within the scope of the contractual intended purpose,
   − The delivery of the remaining ordered goods is ensured and
   − The customer does not incur any significant additional expenses or costs as a result.

3. Deliveries shall be made "ex works" unless otherwise agreed in writing between the parties.

4. The specified delivery deadlines are always subject to the contractual cooperation of the customer. Prospective deadlines and dates for deliveries and services are always only approximate unless they are promised as "definite". Compliance with our obligation to deliver pre-supposes that the customer fulfils their obligations in a timely and proper manner.

5. If we ourselves are not supplied correctly and/or on time although we have placed at least congruent orders with reliable suppliers, we shall be released from our obligation to perform and may withdraw from the contract, provided that the delay in delivery is not only of temporary nature.

6. If, after the conclusion of the contract, it becomes apparent that the customer does not offer sufficient guarantee for their ability to pay and that our claim for payment is at risk, we shall be entitled to refuse delivery until the customer has effected the payment or provided security for it. If the payment or provision of security is not made within 12 working days after a request to that effect, we shall be entitled to withdraw from the contract.

7. If the customer is in default with acceptance or collection or responsible for a delay in dispatch or delivery, we are entitled — without prejudice to further claims — to demand a lump sum for costs in the amount of the usual local storage costs, irrespective of whether we store the goods on our or a third party's premises. The customer reserves the right to prove that no or less damage has been incurred.

§ 5 Delay in delivery, force majeure, reservation of self-delivery

1. elero GmbH shall not be liable for delays or other non-fulfilled contractual obligations if the failures are due to force majeure, i.e. factors beyond our control.

2. We are entitled to withdraw from the contract insofar as we do not receive the delivery item despite the prior conclusion of a corresponding purchase contract on our part; our responsibility for intent or gross negligence shall remain unaffected. We shall inform the customer without delay of the unavailability of the delivery item and, if we wish to withdraw, exercise the right of withdrawal without delay; in the event of withdrawal, we shall reimburse the customer for the corresponding withdrawal without delay.

3. If the delivery deadline agreed with the customer cannot be met as a result of circumstances beyond our control (in particular operational disruptions of any kind, difficulties in the procurement of materials or energy, transport delays, strikes, lawful lockouts, shortage of manpower, shortage of energy or raw materials, difficulties in obtaining the necessary official permits and/or official measures in our sphere or in the sphere of our suppliers), the delivery period shall be extended by the period of the hindrance plus a reasonable resumption period.

4. If the circumstances impeding the delivery still persist one month after expiry of the agreed delivery period, either side may withdraw from the contract. Any further claims due to exceeding the delivery deadline not caused by us intentionally or by gross negligence are excluded; claims for damages shall be limited to the foreseeable damage specific to the contract.

§ 6 Place of performance and transfer of risk

The place of performance for all obligations arising from the contractual relationship is our registered office in 73278 Schlierbach for orders in the field of drive technology and our registered office in 07381 Pößneck for orders in the field of linear technology.

§ 7 Packaging

We shall pack the goods appropriately. The costs for the disposal of transport and sales packaging shall be borne by the customer.

§ 8 Shipment

1. If shipment is agreed between the parties, the risk of loss of the delivery item shall be passed on to the customer at the latest when the delivery item is handed over to the forwarding agent, carrier or other third party designated to carry out the shipment. This also applies if partial deliveries have been made and we have provided also other services.

2. If the shipment or handover is delayed due to circumstances caused by the customer, the risk shall be passed on to the customer on the day on which the delivery item is ready for shipment and we have notified the customer.

3. Any storage costs after the transfer of risk shall be borne by the customer. In the event of storage by us, the storage costs shall amount to 0.5% of the invoice amount of the delivery items to be stored per expired week. We reserve the right to claim and verify further or lower storage costs.

4. We shall insure the consignment against theft, breakage, transport, fire and water damage or other risks only at the express request of the customer and at their expense.

§ 9 Material defects

1. The customer shall be subject to the statutory obligation to inspect the goods and to give notice of defects in accordance with § 377 of the German Commercial Code (HGB).

2. The wear and tear or consumption of batteries (including rechargeable batteries) and other wear products does not constitute a material defect. The legal warranty for the usual, generally expected condition and intended use of these articles is not affected by this. Insofar as we provide a warranty or guarantee for certain products/product groups that goes beyond the statutory liability for defects, in particular by granting an extended period for material replacement free of charge due to defects, this shall not apply to wear and tear or consumable items used.

3. The customer cannot derive any rights from material defects that do not or only insignificantly impair the value or the suitability for the use recognisable to us.

4. If the goods exhibit any material defects when the risk is transferred, we shall be entitled and obliged to rectify the defects. The defects shall be rectified at our discretion by repair or replacement delivery.

5 If the rectification of defects fails, does not take place within a reasonable period set by the customer or is refused, the customer shall be entitled to decide whether to withdraw from the contract, demand a reduction of the purchase price corresponding to the defect and value or - within the limits of the following paragraphs - demand damages instead of performance.

6. If a material defect leads to damage, we shall be liable in accordance with the statutory provisions insofar as this concerns personal injury or the damage falls under the product liability law or is based on intent or gross negligence.

7. If the damage is based on a culpable breach of an essential contractual obligation or a "cardinal obligation", we shall only be liable for the foreseeable damage specific to the contract, with the exception of the cases cited in para. 3.

8. Any further contractual and tortious claims of the customer are excluded. With the exception of the cases cited in para. 6, we shall not be liable in particular for damage that has not occurred to the delivery item itself or for the loss of profit or any other financial losses of the customer.

§ 10 Other liability for damages

1. The provisions in § 9, para. 6 - 8 shall also apply to claims for damages due to other breaches of duty. In the event of a breach of a pre-contractual obligation or an impediment to performance already existing at the time of conclusion of the contract (§§ 311, para. 2, 311a of the BGB), our compensation obligation shall be limited to the negative interest.

2. The provisions of § 9, para. 6-8 shall apply accordingly to our liability in tort.

3. Insofar as our liability is excluded or limited, this shall also apply to the personal liability of our employees, workers, staff, representatives and vicarious agents.

§ 11 Retention of title

1. Ownership of the delivered goods shall remain reserved until all our claims against the customer arising from the business relationship — including future claims arising from contracts concluded at the same time or later — have been settled. This also applies if claims are included in a current invoice and the balance has been struck and accepted. Ownership shall not be passed on to the customer until they have repaid all of their liabilities to us, irrespective of the legal basis of the liability. We are obligated to release our securities should their value exceed our claims by more than 10 percent.

2. The purchaser is entitled to sell or process the goods in the orderly course of business. This right shall expire upon cessation of payments or the application for or opening of insolvency proceedings. Any processing shall be carried out by the customer on our behalf without any obligation on our part. In the event of processing, combining or mixing the reserved goods with other goods, a co-ownership share in the new item shall always arise for us, notably in relation of the value (= gross invoice value including ancillary costs and taxes) of the reserved goods to the value of the new item in the event of processing or in relation of the value of the reserved goods to the value of the other goods in the event of combining or mixing.

3. The customer hereby assigns all claims to us accrued from the resale of the goods. The customer shall remain authorised to collect these claims even after the assignment. Our right to collect the claims ourselves shall remain unaffected; however, we shall not make use of this right as long as the customer duly fulfils their payments and other obligations. Upon request, the customer shall inform us of the assigned claims and their debtors, provide all information necessary for collection, hand over the relevant documents and inform the debtors of the assignment.

4. In the event of conduct in breach of contract on the part of the customer — in particular in the event of default in payment — we shall be entitled to withdraw from the contract and to take back the goods. To this end, the customer hereby irrevocably permits us to enter its business and storage premises without hindrance and to take the goods with us.

5. Insofar as and for as long as the reservation of title exists, the customer may neither assign by way of security nor pledge goods or items manufactured from them without our consent.

6. The customer shall immediately inform us in writing of any seizures or other interventions by third parties. The customer is prohibited from entering into any agreements with their own customers which may affect our rights.

7. We undertake to release the security to which we are entitled at the request of the customer and at our discretion to the extent that the realisable value of the security exceeds the claim to be secured by more than 10% or its nominal amount by more than 50%.

§ 12 Final provisions

1. Any invalidity of individual provisions shall not affect the validity of the remaining provisions.

2. If the customer is a merchant, the place of jurisdiction for all disputes with them shall be the registered office of elero GmbH in 73278 Schlierbach. The place of jurisdiction is not exclusive.

3. German law shall apply exclusively to the exclusion of the UN Convention on Contracts for the International Sale of Goods (CISG).

4. In accordance with the provisions of the Federal Data Protection Act, we would like to point out that we store personal data (name, address) of the customer by EDP technology for internal purposes only.

elero

elero GmbH Antriebstechnik, Maybachstr. 30, 73278 Schlierbach, Germany

Managing Director: Davide Campagnari, Ulm District Court HRB 748671, **As of 01/01/2025**

Excellent control in action.

elero is one of the world's largest manufacturers of electric drives and control systems for intelligent building automation.

As a wholly owned subsidiary of the Italian Nice Group, we specialize in roller shutters and sun protection. We are convinced that intelligent, comprehensive control of light and temperature significantly improves well-being and living comfort. That's why we are constantly developing new products to meet the demands of the market and offer innovative control systems and tried-and-tested drive technology for almost every requirement.
