Warning!

Important safety instructions!

Always observe the following instructions.

- The provisions of the local public utilities and stipulations for wet and damp rooms in accordance with VDE 100 must be observed during system installation.
- For use in dry rooms only.
- Use unmodified **elero** original parts only.
- Keep persons away from the systems guide track.
- Keep children away from controls.
- Always comply with national stipulations.
- The equipment contains small parts that could be swallowed.

Explanation of buttons

Buttons under the cover

General information

The MonoTec is a central pushbutton switch for the ProLine comfort control unit and can be used to operate two groups centrally or separately.

Note: The MonoTec may be used in combination with ProLine devices only.

The motor **cannot** be operated via the MonoTec directly.

Designated use

The MonoTec may **only** be used to operate roller shutters/venetian blinds in combination with the ProLine comfort control unit.

This device may only be used in connection with equipment from other manufacturers following consultation with your local retailer.

Installation/connection

Connection

Warning!

Risk of injury by electric shock!

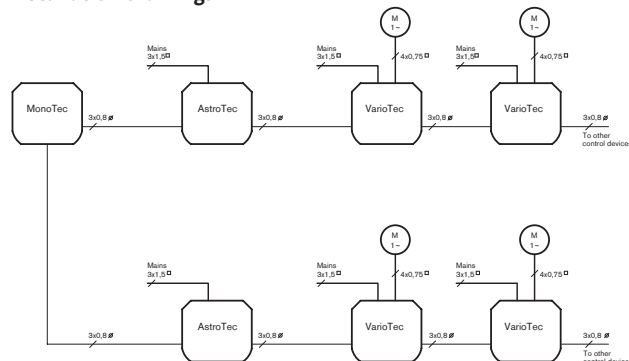

- This device must be installed by an authorised electrician!

1. Remove the protective caps.
2. Connect.

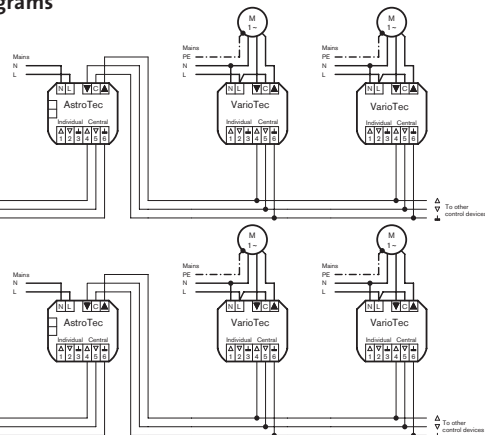

3. Replace the protective caps on the power supply unit.
4. Secure the power supply unit in the box.
5. Insert the operating device into the frame and plug it into the power supply unit.
